Can my patrons listen to NetLibrary eAudiobooks on their iPod?
No. NetLibrary eAudiobooks do not support the use of the Apple iPod for playback. iPods use a file format that does not support the Digital Rights Management protection required by NetLibrary eAudiobooks at this time. Why is digital rights management important?
Digital rights management protection helps ensure that the content of

NetLibrary eAudiobook publishing partners is secure, especially when items are checked out rather than purchased. Digital rights management technology allows checked out items to expire on the due date.
